CONGRATS ON YOUR NEW VIDEOTRON ILLICO TERMINAL!

You now have exclusive access to illico Cloud, your gateway to the best TV entertainment experience out there.

With illico Cloud:

- Watch live TV and pick up where you left off watching, anywhere you go.
- Customize your TV experience as you build your user profile. illico Cloud remembers you and keeps track of what you like to watch, as well as your favourites.
- Record the shows you love remotely.
- Enjoy sharp picture quality and store memorable TV moments.
- Use the Multi-Room PVR to watch recordings on any TV in your home.
- Take advantage of high-tech features that make your life easier. There’s one menu for everything, a streamlined and user-friendly Program Guide, smart Video on Demand service and a search tool that quickly scans the entire illico catalogue for you.

Use your tablet or mobile device to download the free illico app now for unrivalled multiscreen entertainment!

Watching TV has never been so simple! illico offers you the best of both worlds: you get to choose between pay-per-view access or an unlimited viewing experience.

- Tune in to channel 900 for a wide selection of special releases, new arrivals, series, events, documentaries and on-demand programming that you can order on a pay-per-view basis.
- Sign up for Club illico and get unlimited access to Videotron’s catalogue of movies, series, kids shows and documentaries. Watch as many times as you want!

For more information, visit us at videotron.com/terminal-support
If you received your Terminal via Canada Post, please follow these steps:
1. Connect your Terminal by referring to the Connect Your Terminal section.
2. Once your Terminal is plugged in, dial the number below to activate it.
   Toll-free: 1-877-226-6385. Monday to Friday: 7:30 a.m. to 10 p.m.
   | Saturday and Sunday: 8 a.m. to 8 p.m.
3. Follow steps 3 to 5 below.

If you bought your HD Terminal or Multi-Room HD PVR from one of our authorized dealers (rather than in a Videotron store), please follow these steps:
1. Connect your Terminal by referring to the Connect Your Terminal section.
2. Turn on the Terminal. Activation should start automatically and may take up to 10 minutes.
   - If activation fails, dial 514-380-7834 or 1-866-380-2134.
     Monday to Friday: 7:30 a.m. to 10 p.m. | Saturday and Sunday: 8 a.m. to 8 p.m.
3. Complete the Quick-Start Wizard that automatically appears when your Terminal is turned on for the first time.
   The Quick-Start Wizard allows you to:
   i. Select your preferred language.
   ii. Activate an Administrator PIN for managing certain functions on the Terminal and ordering on-demand content. Administrator PIN: _________________
   iii. Activate and configure Parental Controls.
4. Create an Order PIN to access content that is permitted by Parental Controls.
   Order PIN: _________________
5. Follow the instructions on page 10 to program the remote to your TV.

IMPORTANT: If the error message “WIZ 502” appears on the screen, you should immediately contact Videotron Technical Support (p. 15), as this indicates that some applications will not work.

CONNECTION

CONNECTING YOUR HD TERMINAL OR MULTI-ROOM HD PVR TO AN HD TV

illico TV New Generation is suited to widescreen HD TVs with a 16:9 aspect ratio. The instructions listed below apply to HD TVs only. If you have a standard TV, or if your TV uses an alternative connection, please contact your retailer or call Technical Support at 1-877-380-2611.

RECOMMENDED CONFIGURATION

HDMI – The HDMI cable transmits high-definition digital video and audio to your TV, with a resolution of up to 1080i.

1. Plug in your Terminal using the recommended cable, as shown below.
   If your TV does not support an HDMI connection, use an alternative connection.
2. Turn on the Terminal by pressing \( \text{on} \) on your remote control.
3. Turn on your TV and select the corresponding Audio/Video input (input 1/2/3 or component 1/2/3) to display content on-screen.
4. Complete the Quick-Start Wizard that automatically appears when your Terminal is turned on for the first time.
5. Program your remote control to your TV by following the instructions on page 10. This will, among other things, enable you to control the volume on your TV with the remote control for the Terminal.

![Diagram of recommended connection](Cable.png)

IMPORTANT:

1. If your screen is blank or starts blinking, please restart your Terminal by unplugging the power cord and plugging it back in.
2. If the problem persists, or if the “WIZ 502” error message pops up, please contact Technical Support at 1-877-380-2611.
3. For other types of connections, please see your retailer.
4. Should the self-installation fail, a fee may apply if a technician is required to come to your home.

PROGRAMMING THE REMOTE CONTROL

To get the most out of your new Terminal, we recommend that you read the next few pages to ensure that you properly program your remote to your TV.

**There are three ways to program your remote control:**
1. Quick programming: for your TV only.
2. Programming using automatic search: for your TV or audio system.
3. Programming by code: for your TV or audio system.

**QUICK PROGRAMMING**

If your TV brand is not among the 10 brands listed below, please use the Automatic Search Programming Method described on the next page.

1. Turn on your TV.
2. Press the and buttons simultaneously until the red light under the button flashes twice, then release both buttons.
3. Press the button once. The red light will turn on.
4. Point the remote at the TV. Refer to the table below and enter the number that corresponds to the brand of your TV set (i.e. 2 for LG). The red indicator light will flash twice and the TV will turn off.
5. Press to confirm the code.
6. Turn your TV back on by pressing the button. If the programming didn’t work, repeat steps 2 to 5 or use the Automatic Search Programming method.
7. After you’ve programmed your remote control, press the button, go to **Settings and Applications** in My illico and then select **Settings**.
8. Then select **Equipment Settings** and specify that the remote’s volume adjustment keys control the TV’s volume (see **Equipment Settings** on p.12).

**NUMBERS** | **HD TV BRAND**  
---|---
1 | INSIGNIA  
2 | LG  
3 | MITSUBISHI  
4 | PANASONIC  
5 | PHILIPS/MAGNAVOX  
6 | SAMSUNG  
7 | SHARP  
8 | SONY  
9 | TOSHIBA  
0 | VIZIO

For more information, visit us at videotron.com/terminal-support
AUTOMATIC SEARCH PROGRAMMING

If the Quick Programming procedure did not work, follow the instructions below. This remote control programming method allows you to control your TV and your audio system.

**NOTE:** When you program the remote control to an audio system, it will only allow you to adjust the volume on the audio system, not the volume on the TV.

1. Turn on your TV and/or your sound system. First program your TV and then your sound system.
2. Press the and buttons simultaneously until the red light under the button flashes twice, then release both buttons.
3. Press 9-9-1 on the remote control. The red light will flash twice.
4. Then press 1 to search for a TV code, or press 3 to search for a sound system code.
5. Point the remote control at the TV or the sound system. Repeatedly press and release the CH+ button until the device turns itself off.
6. When the device is off, press the button to confirm the programming. The red light will flash twice. If the programming did not work, repeat steps 2 to 5.
7. Repeat steps 2 to 5 to program your audio system.

RESETTING YOUR REMOTE CONTROL

If you would like to program your remote control to work with other devices, or if you are having problems getting it to work, you can reset it by following these steps:

1. Press the and buttons simultaneously until the red light under blinks twice, then release both buttons.
2. Press 9-7-7 on your remote control. The red light will blink four times to confirm that the remote control has been reset.

**NOTE:** If neither of the two suggested programming methods worked, refer to the programming method by code in the complete version of the guide available on the Web.
This section will help you configure your video and audio preferences so that you can get the most out of your HD TV and new Terminal.

Go to your Terminal’s preferences:
1. Press **MENU** to launch the main menu.
2. Using the arrows, go to **Settings and Applications** in **My illico**.
3. Select Settings, go to Equipment Settings and then press **OK**.

You can choose:
- **When you would like your Terminal to switch to standby mode**: Configure your Terminal so that it turns off automatically when you want it to (date and time). When you would like your Terminal to turn on: Configure your Terminal so that it turns on automatically when you want it to (date and time).
- **The model of your remote control**: Select the model of your remote control to get the most out of its features.
- **The picture resolution**: It is important to choose a 1080i or 720p resolution, depending on the viewing mode of your HD TV. If you do not have an HD TV, you can choose a 480i or 480p resolution. HD channels are available after channel 600.
- **The volume control**: Determine whether you would like your remote to control the volume on your TV or Terminal. If your remote control has been programmed to your TV, please ensure that the volume control button is set to work with your TV or audio system.
- **The display**: Display the time on the Terminal when it is turned off.

HELP PORTAL

illico TV new generation now has a Help Portal that is accessible via the main menu. The Help Portal offers demos and a FAQ section concerning most of the available features.

**How to get to the Help Menu:**
1. Press **MENU** to launch the main menu.
2. Using the arrows, go to **What’s New** in **My illico**.
3. Scroll down the menu using the arrows, select the help topic you want to learn more about and then press **OK**.
4. You’ll find an FAQ for each of the help topics, some of which feature demos.
VIDEOTRON’S STANDARD WARRANTY

Benefit from a free, three-year (3) standard warranty on your Terminal. In the event of breakage resulting from normal use of the original Terminal, the standard warranty entitles you to a free replacement Terminal of equal or superior quality.

This warranty automatically begins on the activation date of the new Terminal and offers the following advantages:

- Automatic replacement of a defective device with a new device within a three-year (3) period
- No waiting: One of our technicians will replace the defective Terminal free of charge

GET TOTAL PEACE OF MIND WITH VIDEOTRON’S MAINTENANCE PLAN

Videotron gives you the opportunity to improve and extend your Terminal’s standard warranty for an extra two (2) years. You can subscribe to the Maintenance Plan within 30 days of your service activation date.

As such, the Terminal you purchased, as well as the remote control, will be covered for a period of five (5) years after the service activation date. If your Terminal or remote control is defective, the warranty under the Maintenance Plan entitles you to exchange it for a new piece of equipment.

1. Cisco 4642 or Samsung 6340 HD terminal, or Cisco 8642 or Samsung 8340 HD PVR. 2. This applies to customers who have purchased a new device. A defective terminal will be replaced with a refurbished terminal, or a new terminal where available, of equal or superior quality. 3. This warranty is non-transferable except in special cases. The Maintenance Plan is not offered with the purchase of a refurbished terminal. 4. The replacement terminal or remote control will be of equal or superior quality to that which was defective. 5. Taxes extra.
FREQUENTLY ASKED QUESTIONS

NOTICE: The first step in resolving problems related to the illico TV service is to reboot the Terminal. Rest assured—your Terminal settings, as well as the recordings on your Multi-Room HD PVR, will remain intact. To reboot the Terminal, unplug the power supply cord, then plug it back in again a few seconds later. Wait a few minutes before turning the Terminal back on. If the problem persists, please contact Technical Support at 1-877-380-2611.

Where can I learn more about the Program Guide, menus and illico apps?
Videotron has provided you with a Help Menu that you can access via illico TV’s main menu and videotron.com/support. There, you’ll find demos, answers to frequently asked questions and a comprehensive user guide that you can download. You can also get to the Help Menu through illico’s main menu when you press the button on your remote control and select What’s New in My illico section.

Can I program my remote control to my TV?
To do so, follow the steps outlined on page 10.

I can’t control the Terminal’s volume with the remote control. Is this normal?
In order to provide you with the highest level of sound quality, the volume controls on the Terminal are disabled when the latter is connected with an HDMI cable. If this is the case, you will only be able to control the volume on your TV. You will have to program your remote control to your TV by following the instructions on page 10.

I programmed my remote control, and now the sound isn’t working. What should I do?
You may have activated the Terminal’s “Mute” function while programming the remote control by pressing OK/SELECT and MUTE. If this is the case, press the VOL+ button on your Terminal. This will disable the “Mute” function, and bring the sound back.

Why is the sound on my TV so low?
Your Terminal’s Volume function controls the strength of the audio signal emitted by the Terminal. When the Terminal’s volume is low, the signal it sends to the TV is equally low. To prevent this, we suggest that you program your remote control to your TV by following the instructions on page 10, and then program the Terminal so that you can only control the volume on your TV. To do this, please refer to the Equipment Settings section on page 12.

For more information, visit us at videotron.com/terminal-support
My Terminal is not working, or my TV screen is black, blue, blurry or snowy. What should I do?
Make sure the Terminal is turned on and that you followed the steps for activating (on page 4) and connecting (on page 8) the Terminal. Because your TV has multiple inputs, it’s important to let your TV know the one you’re using. Set your TV to the right input using the remote control it came with, i.e. by setting it to either Input 1, 2 or 3; Component 1, 2 or 3; or HDMI 1, 2 or 3.

The sound cuts or the picture breaks up when I watch TV. What should I do?
Reboot the Terminal by unplugging the power supply cord and plugging it back in. If the problem persists, restart the Terminal as indicated above, or contact Technical Support at 1-877-380-2611.

When I plug in my Terminal with an HDMI cable, the picture breaks or an error message appears onscreen. What should I do?
Once you’ve made sure that the HDMI cable is properly plugged into the Terminal, reboot the Terminal by unplugging the power supply cord and plugging it back in. If the problem persists, it may be that your TV is not compatible with the Terminal’s HDMI port. Instead, proceed with the alternative connection by using a component cable. Seeing as the Terminal does not come with a component cable, please contact your retailer or call Technical Support at 1-877-380-2611.

Is it normal that broadcasts on certain channels don’t fill the screen?
Yes. The only channels that broadcast full-screen are HD channels (channels after channel 600 and up). Channels where the picture does not fill the screen are standard-definition channels. However, some shows airing on HD channels are broadcast in standard definition.

How can I switch to full screen mode when I’m watching a channel that’s broadcast in standard definition?
The # button on your remote control allows you to stretch the picture or to zoom in and get rid of the black bars that border the left and right of the screen when you’re watching a channel in standard definition. Press # until you obtain the desired zoom mode: Normal, Large or Zoom.

My Terminal has been activated and I am getting channels that don’t come with my TV package. Is that normal?
Yes. You’ll start receiving the exact channel line-up that comes with your TV package the day after your Terminal is activated. In the meantime, you can watch several channels that might not be included in your package.

THE COMPLETE USER GUIDE IS AVAILABLE AT VIDEOTRON.COM/Terminal-support

For more information, visit us at videotron.com/terminal-support
For security purposes, please read the following before connecting your Terminal.

⚠️ POSITIONING AND VENTILATION
The Terminal has openings for ventilation that protect it from overheating.
- Avoid obstructing these openings and do not place other equipment, including televisions, lamps, books or any other objects, on the Terminal. Do not place it in an enclosure such as a bookcase or equipment rack, unless suitable ventilation is provided.
- Do not place the Terminal on a bed, sofa, rug or similar surface, or close to a radiator or source of heat.
- Lay the Terminal on a stable surface that’s able to support its size and weight.

⚠️ ACCESSORIES AND CLEANING
Only use Videotron-recommended accessories. Do not open the cover of the Terminal. Unplug the Terminal and clean it with a damp cloth. Do not use a liquid or aerosol cleaner, or a magnetic/static cleaning device.

⚠️ OBJECT AND LIQUID ENTRY
Do not expose the unit to moisture, or spill liquid on or near it. Do not place the unit on a wet surface. Never push objects of any kind into the unit’s openings, as they may touch dangerous voltage points or cause short-circuits that could result in a fire or electric shock.

⚠️ POWER SOURCES
A label on the unit indicates the correct power source for this equipment. Operate the unit only from an electrical outlet that has the voltage and frequency indicated on the label. Do not overload electrical outlets or extension cords, as this could result in a fire or electric shock.

⚠️ POWER CORD PROTECTION
To avoid damaging them, arrange all power cords so that they are not walked on and make sure no objects are placed on or against them. Pay particular attention to cords that are connected to plugs, electrical outlets or accessories, and to the places where the cords exit the unit.

For more information, visit us at videotron.com/terminal-support
CAUTION! To prevent electric shock, match wide blade of plug to wide slot, then insert fully. If you are unable to fully insert the plug into the outlet, contact an electrician to replace your obsolete outlet.

GROUNDING
The Terminal has a two-prong plug. Properly ground the unit by inserting the plug into a grounded electrical, two-socket outlet. If the plug is polarized, it has one wide prong and one narrow prong. This plug fits only one way.

SERVICING
This unit is covered by a three-year warranty. Opening the case will void your warranty. Refer all servicing to a qualified Videotron technician. Contact your cable service provider for instructions. Service should be referred to a Videotron technician when any of the following occurs:
• There is damage to the power cord or plug.
• Liquid enters the unit, or there is exposure to rain or water.
• A heavy object falls on the unit, or you drop the unit or damage the casing.
• The unit malfunctions (the instructions in this guide describe the proper operation).
• The unit shows a distinct change in performance.

EXTENDED WARRANTY
For greater peace of mind, Videotron offers you the possibility of extending the warranty for an additional two years. Customers who want this extended warranty must apply for it within 30 days of the service activation date. The unit purchased will then be covered for a total of five years following the activation date.
**IMPORTANT** : We wish to remind you that you are responsible for notifying Videotron of your new address and telephone number if you are moving. All the HD terminals you get for your home must be connected to the network at the same address.

Videotron’s network can detect a terminal that has been relocated and reconnected to the network. In certain circumstances, the terminal will be deactivated. In some cases, legal proceedings may be initiated for signal theft.

**SIGNAL THEFT IS ILLEGAL.**

Theft is theft. Stealing radio and television signals is no different. The law is clear: On April 26, 2002, the Supreme Court of Canada upheld a law making the theft of broadcasting signals illegal in Canada. A message brought to you by the Coalition Against Signal Theft, which wants you to know the facts. The Coalition includes satellite distributors, cable companies, broadcasters, producers, programmers and artists.

For more information, visit us at videotron.com/terminal-support
